

AI & MLOps · Egypt & the Middle East

Building the AI & MLOps Community in MENA

Contributing to the AI and MLOps community in Egypt and the Middle East.

We bring together engineers, learners, and industry professionals through technical education, community initiatives, and real-world AI & MLOps projects.

Work With Us

Explore Our Impact

Who We Are

More Than a Community

MLOps MENA is a growing technical community focused on AI, Machine Learning, MLOps, and practical engineering — bringing together **30+ active team members** and a wider community of engineers and learners.

Learn

Practical technical education and sessions built around real MLOps workflows, not slideware.

Build

Real projects and hands-on engineering experience across the full delivery lifecycle.

Connect

Connecting engineers, mentors, companies, and opportunities across the region.

Our Impact

Fast growth, real numbers

Achieved in ~1 Month

4,000+

LinkedIn Followers

1,300+

YouTube Subscribers

16,000+

YouTube Views

3,000+

YouTube Watch Hours

2,000+

WhatsApp Community Members

1,000+

Discord Members

30+ Team Members

Built by a team of around 30 people working across content, community, technical education, and operations.

Content & Community

A real content operation, not a blog

25+ pieces of content — August

Articles	2
YouTube video-summary posts	3
Educational posts — Session 1 & 2 topics	13
Announcement posts	7

Consistent technical content helped us grow our audience and strengthen community engagement.

Services

What We Can Build With You

Talent & Outsourcing

Access skilled AI and MLOps engineering talent for your projects and technical teams.

Delivered a team of 2 Senior Engineers + 1 Junior Engineer for a client through a contract with Phi.ai.

[Phi.ai on LinkedIn](#) ↗

Corporate Training

Practical AI and MLOps training programs designed for corporate teams, focused on the tools, workflows, and engineering practices used in real production environments.

AI Engineering

Machine Learning

MLOps

Docker

CI/CD

Model Deployment

LLM Engineering

Software Project Delivery

End-to-end AI software development — from problem definition and model development to deployment and production-ready systems.

Talent & Outsourcing

Engineering Team Placement

2 Senior Engineers + 1 Junior Engineer — Client: Phi.ai

What the Community Does

The MLOps Practitioner

A practical learning program focused on MLOps and production ML engineering.

1,200+ learners

Community Sessions

Technical sessions delivered by experienced engineers and practitioners.

Community Standouts

A weekly recognition program highlighting active members — activity, engagement, session attendance, projects, and contribution.

Technical Content

Articles, educational posts, video summaries, and practical technical resources.

Testimonials

From the Community

“Great technical content and a community that actually focuses on practical learning.”

— Community Member

“The sessions felt like working sessions, not lectures — I left with something I could actually use.”

— Community Member

“It's rare to find a community this new moving with this much discipline.”

— Community Member

Why MLOps MENA

- ✓

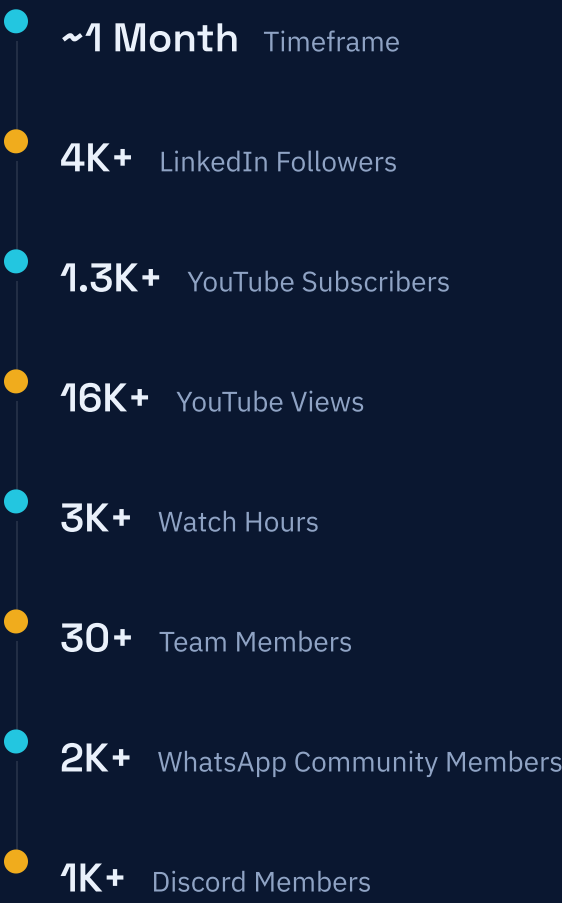

Technical Expertise
Practical AI & MLOps knowledge, not just theory.
- ✓

Real Engineering Experience
Projects, deployment, infrastructure, and production workflows.
- ✓

Growing Talent Network
A community of engineers and technical learners across MENA.
- ✓

Community + Industry
We connect education, engineering talent, and real business needs.

Small team. Fast execution. Measurable impact.

Let’s Build Something With AI.

Whether you’re looking for AI & MLOps talent, corporate training, or an AI software solution, let’s talk.
